

TKA CONSTRUCTION

[Home](#)

TKA is an experienced installer of **Pevco** pneumatic tube systems. **Pevco** manufactures the **AccuSend Point-to-Point** system, capable of 25 ft. per second. These systems are easy to use, easy to maintain, contain built-in safety features, are UL listed, and can be customized to meet customer's requirements. **Pevco Smart Systems** are fully computerized, while **Pevco Stations** and **Smart Products** allow for upgrades, add-ons or conversion of existing system. Contact [TKA Construction](#) today for a detailed analysis of how we can help you communicate better.

SmartSystem

The world's most advanced computerized pneumatic tube transport system is at work now in the nation's largest, most prestigious hospitals - find out what **SmartSystem** can do for you.

Stations

Create a system with stations customized to meet each department's needs - high volume, low volume, counter mounted, pedestal mounted, wall recessed... One size does NOT fit all.

SmartProducts

Upgrade, add-on, or convert your existing system to the most advanced computerized pneumatic tube transport system on the market - you'll thank yourself.

Accusend Point-to-Point

Need to speed blood products, tissue specimens, supplies, or pharmaceuticals between two locations in your health care facility - and keep your employees working at their jobs? Here's how.
